AHMED SALAMA
FRONT-END WEB DEVELOPER

Phone: 01003192331 │ Email: a7medsamirr2@gmail.com │ LinkedIn: linkedin.com/in/ahmeedsalama

SUMMARY

Passionate and detail-oriented Front-End Developer with a strong foundation in React.js (App Router), Next.js Redux, and modern JavaScript (ES6+). Skilled in crafting responsive, scalable, and high-performance web applications using Tailwind CSS, CSS Modules, and Styled Components. Proficient with tools such as Git/GitHub, npm/yarn, Figma, and Chrome DevTools, with solid understanding of SSR/SSG, RESTful APIs, performance optimization, and responsive design principles.

Adept at integrating AI-assisted development tools to enhance productivity and code quality while maintaining a deep understanding of underlying technologies and best practices. Enthusiastic about building intuitive user interfaces, clean architecture, and continuously learning new front-end innovations.

TECHNICAL SKILLS

- **Languages**: JavaScript (ES6+), HTML5, CSS3 ,Typescript
- **Frameworks**: React.js (App Router), Next.js, Redux
- **Styling**: Tailwind CSS, Bootstrap, CSS Modules, Styled Components
- **Tools**: Git, GitHub, npm/yarn, Figma, VS Code, Chrome DevTools
- **Concepts:** SSR/SSG, RESTful APIs, Performance Optimization, Responsive Design, BaaS (Supabase, Backendless)
- **Data Format**: JSON (data exchange & manipulation)

EXPERIENCE

Freelance Front-end Development Services
Self-Employed │ 2024 – Present

- Developed and delivered 10+ responsive web applications using React.js, achieving a 95% client satisfaction rate through consistent performance and design quality.
- Converted 20+ Figma designs into fully functional, pixel-perfect interfaces with 98% UI accuracy and 30% faster load times through lazy loading, code splitting, and optimized assets.
- Collaborated with clients to refine requirements, enhance UX, and ensure scalability and maintainability across diverse projects.
- Leveraged AI-assisted tools (e.g., GitHub Copilot, ChatGPT) to accelerate development and improve code quality — while maintaining strong technical control and clean coding standards.

Front-End Development Intern
Web Master │ 2025

- Completed a front-end development internship focused on building responsive and interactive web interfaces using HTML, CSS, JavaScript, and React.
- Collaborated with senior developers to implement UI components and improve website performance.
- Worked with Supabase and Backendless for authentication, database integration, and API management gaining strong understanding of BaaS (Backend-as-a-Service) concepts.
- Gained practical experience in version control (Git/GitHub), cross-browser compatibility, and responsive design principles.
- Enhanced understanding of real-world workflows, teamwork, and agile development practices.

PROJECTS

Basket Shop (E-Commerce)
A full-stack responsive e-commerce app built with React.js and Supabase. Features product filtering, search, wishlist, cart, and checkout with React Context API for state management and a contact form for user inquiries.
Live-demo   Github

Product Management System
Developed a responsive CRUD application using HTML, CSS, and JavaScript, with data persistence via local storage. Features include product search, total price calculation, and batch deletion—all managed client-side for a seamless user experience.
Live-demo   Github

Style Loom (E-Commerce)
Full-stack product management and e-commerce platform built with React Router, protected routes, role-based access control, and a full admin dashboard for managing users, categories, products, and website content. Includes authentication (email & Google), product details pages, contact form, and a fully responsive public website.
Live-demo   Github

Zekr – Islamic Platform
Tech: Next.js 14, TypeScript, Tailwind CSS, Alquran API, Schema.org. Developed a high-performance Islamic platform for Quran audio, digital Mushaf, and lectures. Implemented advanced SEO and Schema.org for search visibility. Features optimized asset delivery, a responsive UI, and custom audio controls with live search.
Live-demo Github

Notes App
A responsive web application designed to help users create, organize, and manage personal notes efficiently. The app features a modern and clean user interface for adding notes with a title, description, and due date.
Live-demo Github

Weather App
A web app that displays real-time weather updates for any city using API integration. Shows temperature, humidity, wind speed, and dynamic weather icons in a clean, user-friendly interface.
Live-demo Github

Dashboard
Interactive React dashboard for managing users and products with authentication and protected routes.
Live-demo Github

Burger King Menu
Tech: React.js, Backendless, Axios, Swiper, React-Icons, Leaflet
Built a responsive Burger King menu web app using React. Integrated Backendless for backend services and Axios for API data fetching. Added interactive sliders with Swiper, location maps via Leaflet, and icons with React-Icons to enhance UI and user experience.
Live-demo Github

Product Dashboard Web App
Built a responsive React dashboard for product management (CRUD) using a RESTful API. Features include product search, add, edit, details view, and batch or single deletion with confirmation dialogs (SweetAlert2). Designed an intuitive UI with Bootstrap, and implemented dynamic total calculation and real-time updates for seamless user experience.
Live-demo

SOFT SKILLS

Teamwork & Collaboration, Problem Solving, Adaptability & Flexibility, Self-Learning & Continuous Improvement, Creativity & Innovation, Hard Work & Commitment, Active Listening, Attention to Detail, Time Management & Organization, Communication Skills.

EDUCATION

Bachelor of BIS
Graduated: 2024

ADDITIONAL INFORMATION

- **Quick learner with a strong passion for web development.**
- **Possesses strong analytical and problem-solving skills gained from an accounting background.**
- **Excellent teamwork, collaboration, and communication abilities.**
- **Highly motivated to develop and grow within a professional and dynamic environment.**
